

K&CHLOR

SALT WATER CHLORINATION

K CHLOR is a high-performance salt chlorination system that lets you enjoy crystal-clear pool water without harsh chemicals. It is a safe, clean, easy alternative to dosing your pool with dangerous, expensive and messy chlorine granules, tablets or liquid. **K CHLOR** improves your pool water quality by using harmless salt.

WHY USE K CHLOR ?

Salt is a natural antiseptic and greatly reduces the eye, ear and skin problems which can be caused by conventional chlorine. At only 1/7th the salinity of sea water, the water has a luxurious feel that is kind to eyes and allergy sufferers. **K CHLOR** is better and safer for the whole family. The **K CHLOR** unit was designed with safety in mind and runs on 7 volts - much less than a car battery generates. It has been approved by electrical authorities for all states.

EASY TO USE AND INSTALL

A **K CHLOR** system consists of two working components. The Electronic Cell which connects easily to standard pool plumbing and the wall mounted Power Pack which controls the operation of the system. **K CHLOR** is simple to operate and install. When used with a timer it automatically chlorinates your pool for the desired period each day, just set the timer, relax and let **K CHLOR** do all the work. The **K CHLOR** system is suitable for domestic and commercial applications of all makes, shapes and sizes. Install it with a brand new pool or convert your existing pool to automatic salt water chlorination. It's easy! Contact your local pool equipment supplier for details.

LOW RUNNING COSTS

K CHLOR costs very little to operate. On average, you will need to run your **K CHLOR** unit for 6-12 hours per day in summer, 4-6 hours in autumn and spring and 2-4 hours during the winter months. The units cost between one and three cents per hour to run, depending on the model chosen.
